RAJNISH KUMAR SINGH

Full-Stack Developer & Manual QA Engineer · JIRA · Postman · REST APIs · SDLC/STLC

rajnish9073564394@gmail.com · +91-9073564394 · LinkedIn · GitHub · GeeksforGeeks

EDUCATION

B.Tech – CSE (Cloud Computing & Automation) Jun 2022 – Aug 2026

Vellore Institute of Technology, Bhopal · CGPA: 8.21 / 10 · Relevant: DBMS, Software Engineering, Computer Networks, DSA

EXPERIENCE

Freelance Full-Stack Developer & QA Practitioner · *Self-Employed* Jan 2025 – Present

- **Dev:** Developed and launched 5+ responsive platforms (React, Next.js, Tailwind CSS) integrating 10+ APIs including Stripe, News API and Gemini; built a real-time AI Voice Interview System using Firebase, Vapi AI Agent and Google Gemini AI with automated feedback for 50+ sessions.
- **Test Design:** Wrote 40+ structured test cases covering positive, negative and boundary scenarios across authentication, API integrations and real-time data flows using STLC methodology.
- **Defect Management:** Logged and tracked 20+ bugs in JIRA with severity classification, reproduction steps, screenshots and expected vs. actual results; reduced average resolution time.
- **API & DB Testing:** Validated 10+ REST endpoints via Postman (payloads, status codes, auth headers, error handling); performed SQL/MongoDB queries to verify backend data integrity post-release.
- **Process:** Regression and smoke testing after every sprint; maintained defect dashboards and test summary reports shared with stakeholders; defect-leakage rate near zero.

Frontend Developer & QA Contributor · *Tutedude Hackathon* 2025

- **Dev:** Built React/HTML/CSS frontend and Node.js/MongoDB backend for a MERN e-commerce platform; introduced vendor and product management modules optimising inventory tracking for 50+ products, improving workflow efficiency by 30%.
- **QA:** Designed full test plan covering catalogue, cart and checkout; documented 25+ JIRA defects through full lifecycle (Open → Resolved → Closed); MongoDB queries confirmed data consistency, reducing transactional errors by 25%.

PROJECTS

AI-Powered Fitness Coach App · *Next.js · Node.js · OpenAI · Gemini · ElevenLabs · Framer Motion · shadcn/ui* Sep 2025

- **Dev:** Engineered AI-driven workout & diet planner using LLMs; integrated ElevenLabs TTS, PDF exporting, localStorage persistence and theme toggling; 200+ users across 15+ responsive screens, achieving a 95 Lighthouse score.
- **QA:** 40+ test cases for plan generation, TTS output, PDF export and localStorage; Postman schema & latency validation on OpenAI/Gemini endpoints (4xx/5xx coverage); 18 UI defects resolved; E2E journey testing reduced post-release bugs by 40%.

Quickbasket — Grocery Delivery App · *MERN Stack · MongoDB · REST APIs* Jan 2025

- **Dev:** Designed secure authentication, admin panel and catalogue for 50+ items; structured MongoDB backend supporting 200+ transactions with reliable data synchronisation; refined checkout logic reducing transactional errors .
- **QA:** 50+ test cases across auth, catalogue, cart and checkout; Postman REST endpoint validation with request/response log evidence; MongoDB integrity checks after every transactional event; regression suites on each code change.

Brain Tumor Detection — CNN Model · *PyTorch · TensorFlow · Flask* May 2023

- **Dev:** Implemented CNN classifier on 3,000+ MRI images with data augmentation and regularisation techniques; built Flask browser inference tool achieving <2 s/scan latency, reducing overfitting by 20%.
- **QA:** Edge-case scenarios for bad inputs, unsupported formats and empty uploads; prediction latency benchmarked over 50+ runs; augmentation outputs validated for consistency before training.

TECHNICAL & TESTING SKILLS

Manual Testing: SDLC · STLC · Test Case Design · BVA · EP · Regression · Sanity · Smoke · Bug Lifecycle · UAT

Bug Tracking: JIRA (issues, sprints, dashboards) · Bugzilla (familiar)

API Testing: Postman — REST validation, collections, environment variables, schema & status code checks

Databases: SQL · MongoDB · PostgreSQL — query-based data validation and integrity checks

Languages: JavaScript · Python · C++ · HTML · CSS

Frontend: React · Next.js · Tailwind CSS · Bootstrap · Framer Motion · shadcn/ui

Backend: Node.js · Express.js · REST APIs · Firebase

Tools & Cloud: Git · VS Code · AWS · Vercel · Netlify · Postman

Automation: Selenium (basic concepts) · scripted UI interaction tests in JavaScript

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Architect Associate · ISTQB Foundation Level — self-study (in progress)
